

This office always has and will continue to follow the CDC standard for universal sterilization.

Every dental operatory is thoroughly wiped down and sterilized between each patient using the highest quality recommended products and procedures of the ADA/CDC for sterilization protocols. We use heat autoclaves for instrument sterilization and disposable supplies to avoid risks cross contamination. Our sterilizers are monitored and tested on a routine basis to ensure they are working at maximum efficiency. We provide disposable hand towels and tissues as well as hand sanitizers for all our patients and staff use.

While we do not take the issue of COVID19 lightly we always treat our office and patients to the highest standard of care even without this concern.

Please be assured we always have you our patients and our staffs health and safety at the forefront of our operating procedures.

How can you protect yourself from novel COVID-19 as well as other flu and virus concerns?

- 1) Wash hands often with soap and water for 20 seconds. (sing the a-b-c song)
IF soap and water are not available, use hand sanitizer.
- 2) Avoid touching your eyes, nose and mouth with unwashed hands.
- 3) Avoid contact with people who are sick
- 4) Cover your mouth/nose with a tissue or sleeve when coughing or sneezing
- 5) Drink plenty of fluids, get quality rest routinely & eat a proper diet.
